The Simple
Computerized Epilator

Hair Removal by Cléo, so simple

You're starting out in computer-assisted permanent electroepilation and are searching for a simple yet upgradeable electrolysis device? Opt for the Apilus Cléo, it's simple and can evolve right along with you! Available in two versions, the Cléo allows you to move from a basic to a more advanced version at any time. A simple way to meet your current and future needs. Brilliant!

The Gentle Way to Permanent Hair Removal

1 system. 2 versions. Simple.

Start with the Flash 128 version

An easy-to-use electroepilation system that yields permanent results.

- Equipped with world-renowned, reliable and ultra stable electronic circuitry;
- Uses 13.56 MHz rapid frequency and digital technology for precise and effective treatments;
- Includes Thermolysis and Flash, two comfortable techniques that quickly eliminate all types of hair;
- Offers 128 user-friendly programs that guide you through the adjustment of your parameters, for all body areas and hair types;
- Includes an automatic function to convert programs for use with insulated probes, so you don't have to think about reducing your settings.

Move on to the Blend 256 version

A flexible system that offers even more options and treatment modes.

- Includes all Flash 128 version features and more;
- Adds the simplified Blend mode to its functions, the ideal solution for distorted hairs;
- Offers the Tolerance Test, an essential function to set your Blend treatments according to your client's sensitivity;
- Adds a range of Blend programs, for a total of 256, to facilitate your work;
- Integrates the Cataphoresis post-epilatory mode, to soothe the skin after treatment.
